REMARKS

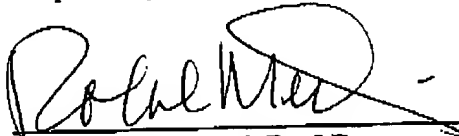

Applicant thanks Examiner Nickol for the telephone call dated July 10, 2006, in which the Examiner noted that Figures 8 and 11 (which recite amino acid sequences) would need to be amended to recite sequence identifiers. Under MPEP 2422.02, Applicant has not amended Figures 8 and 11, but rather has inserted sequence identifiers into the Brief Description of the Drawings. Applicant has also amended the specification to include references to SEQ ID NOs. 20 and 21. No new matter has been added.

Also, Applicant encloses herewith a paper copy of a substitute Sequence Listing, as requested by the Examiner. The paper copy of the substitute Sequence Listing is identical to the computer readable copy of the Sequence Listing filed in U.S. Serial No. 09/357,708, filed July 20, 1999, from which the present application claims priority. In accordance with 37 C.F.R. § 1.821(e), please use the computer readable form filed in that application on March 13, 2001, as the computer readable form for the instant application. It is understood that the Patent and Trademark Office will make the necessary changes in application number and filing date for the computer readable form that will be used for the instant application.

Applicant asks that the Examiner enter the present amendment. No fee is believed to be due. Please apply any other charges or credits to Deposit Account No. 06-1050, referencing Attorney's Docket No. 21052-003008.

Respectfully submitted,

Date: 11 July 2006
